PROFESSIONAL SUMMARY

AI-focused Full-Stack Engineer with hands-on experience building modern web applications and integrating AI/LLM capabilities using Python, React.js, Node.js, JavaScript, and RESTful APIs. Experienced in RAG pipelines, vector search, LLM orchestration, and scalable full-stack development. Strong foundation in Data Structures, Algorithms, OOP, DBMS, and system design, with a focus on building practical, production-ready AI-powered applications.

TECHNICAL SKILLS

Languages	Python, Java, JavaScript (ES6+), SQL, HTML5, CSS3
AI, LLM & RAG	RAG Pipelines, LangChain, LlamaIndex, FAISS, ChromaDB, Gemini / LLM APIs, Vector Embeddings
Full-Stack & Frameworks	FastAPI, Flask, React.js, Node.js, Express.js, RESTful APIs
Databases & Cloud	MongoDB, MySQL, MongoDB Atlas, Vector Stores
Core Competencies	Data Structures & Algorithms (DSA), OOP, Operating Systems, DBMS, System Design
Developer Tools & DevOps	Git, GitHub, Postman, Vercel, VS Code, CI/CD Workflows

WORK EXPERIENCE

Web Development Intern – **Cognifyz Technologies** Remote

- Architected and implemented full-stack web modules using Node.js, Express.js, and client-side rendering frameworks.
- Integrated secure, resilient RESTful endpoints for efficient asynchronous data flow between client and server layers.
- Conducted rigorous code reviews and maintained strict Git/GitHub version control workflows to deliver clean, production-grade solutions.

Front-End Development Intern – **Saiket Systems** Remote

- Built dynamic, high-performance web interfaces using JavaScript and modern responsive CSS architectures.
- Optimized critical rendering paths and asset bundling, reducing page load latency and boosting cross-browser compatibility.
- Collaborated with technical mentors to translate complex feature specifications into modular, reusable UI components.

FEATURED PROJECT

Lumina AI Search & RAG Platform Deployed & Open Source Live Demo | GitHub

Tech Stack: Python, FastAPI, LangChain, LlamaIndex, FAISS, Google Gemini / LLM APIs, Vector Embeddings, Vercel, Git

- **Document Ingestion & RAG:** Engineered an end-to-end RAG pipeline supporting multi-format document uploads (PDFs, TXT) with semantic text chunking, FAISS vector indexing, and low-latency contextual search.
- **Automated Code Generation:** Developed dedicated LLM prompt chains and agents capable of producing, refactoring, and explaining syntactically accurate code with context-aware logic explanations.
- **Dual-Mode AI Search:** Built a flexible querying engine that seamlessly switches between knowledge-grounded document Q&A and general-purpose conversational LLM search with streaming response generation.
- **High-Performance Backend & CI/CD:** Implemented asynchronous REST APIs using Python (FastAPI) and orchestrated automated deployment and build pipelines via Vercel and GitHub.

EDUCATION

Kamala Institute of Technology and Science (KITS), Huzurabad Expected Grad: 2028

Bachelor of Technology (B.Tech) in Computer Science and Engineering | **CGPA: 7.6 / 10**

Intermediate Education: SPR | 10th Grade: DAV

CERTIFICATIONS & ACHIEVEMENTS

- **NPTEL Certifications:** Completed coursework in *Programming in Java* and *Introduction to Internet of Things (IoT)*.
- **Problem Solving:** Solved extensive algorithmic and data structure challenges across *HackerEarth* and *LeetCode*.
